

SANJAY SHAH

Senior Software Engineer · Java, Spring Boot, Cloud & Identity

Kathmandu, Nepal · +977 986 327 4892 · messanjayshah@gmail.com · sanjayshah.com.np · linkedin.com/in/mesanjay · credly.com/users/sanjay-shah.861076ff

PROFESSIONAL SUMMARY

Senior Software Engineer with 6+ years designing, building and delivering scalable, secure, high-performance software in agile teams. Specialises in Java, Spring Boot, microservices and AWS, with domain depth in healthcare information systems, identity and access management, and multi-tenant SaaS. Track record of leading delivery, mentoring developers, and owning mission-critical systems, with a strong focus on architecture, performance, secure coding and AI-assisted engineering.

SKILLS

Languages	Java 8 → 25 (virtual threads), SQL, TypeScript, JavaScript
Frameworks	Spring Boot, J2EE, Hibernate, JPA, React, Thymeleaf, Tailwind CSS, HTMX, Alpine.js
Architecture	Microservices, event-driven (Apache Kafka, outbox pattern), multi-tenancy, RESTful APIs, multithreading, design patterns
Cloud & DevOps	AWS (EC2, S3, Lambda, DynamoDB, API Gateway), Docker, Kubernetes (k3s), Helm, Argo CD (GitOps), Terraform/OpenTofu, GitHub Actions, Jenkins, Prometheus, Maven, Gradle
IAM & Security	Okta, Auth0, Keycloak, OAuth2, OIDC, SAML, SCIM, LDAP, JWT
DevSecOps	Semgrep, Checkmarx, SonarQube, Trivy, gitleaks, Checkov, Kubescape, Cosign
Databases	PostgreSQL (row-level security), Flyway, Redis, MySQL, MongoDB
Testing	Playwright (E2E), JUnit 5, Mockito, Testcontainers, ArchUnit
AI-assisted	Claude Code, MCP servers, multi-agent workflows, Caveman (token-efficient agent mode), Ponytail (minimal-code discipline), AI-assisted code review and testing
Practices	Git, Agile/Scrum, code review, mentoring

WORK EXPERIENCE

Senior Software Engineer <i>Healthcare information systems</i>	Nov 2025 – Present
- Build and enhance healthcare software with Java, Spring Boot and cloud-native services, with an emphasis on reliability and performance. - Apply secure-coding and data-protection practices to the handling of sensitive patient information. - Use AI-assisted engineering workflows to speed up development, code review and testing.	
Senior Software Engineer <i>Identity & access management for enterprise clients (US and Europe)</i>	Aug 2022 – Nov 2025
- Designed and implemented custom SCIM connectors and migration tools, including identity migration from Keycloak to Okta, improving client onboarding speed and data accuracy. - Delivered identity federation, SSO and system upgrades using OIDC and SAML for enterprise clients in sports media and banking. - Built secure web applications with Okta, Auth0 and Spring Boot, supporting OAuth 2.0 flows and multi-tenant architecture. - Modernised legacy IAM connector codebases for performance and maintainability, and introduced Checkmarx static analysis to enforce secure development. - Contributed to an internal pre-sales estimation tool, improving estimation accuracy for enterprise deployments. - Earned multiple Okta certifications and mentored engineers on identity standards.	

Full Stack Software Developer

Aug 2019 – Feb 2022

Multi-tenant SaaS ERP for education

- Designed and developed ERP modules including HR & Payroll, CRM, CMS and Online Examination.
- Led the re-architecture of the CRM module with React, Spring Boot and PostgreSQL for usability, maintainability and scale.
- Built frontend (React, HTML, jQuery, Bootstrap) and backend (Spring Boot, JSP, Thymeleaf, MySQL, PostgreSQL) features, delivering a 25% performance gain.
- Migrated a monolith to a modular architecture with Maven and Gradle; containerised with Docker on AWS EC2, cutting manual deployment time.
- Contributed to the SaaS foundation redesign, improving multi-tenancy and onboarding of new institutions.

EDUCATION

- Master of Computer Science (MCS) — pursuing
- Bachelor's Degree in Computer Science — 2015 – 2019

CERTIFICATIONS

- Okta Certified Developer, CIC — 2024
- Okta Certified Consultant — 2023
- Okta Certified Developer, WIC — 2023
- Web Security and Access Management: JWT, OAuth2 and OpenID Connect — 2022
